

BLANKET WASHING INSTRUCTIONS

Please read thoroughly...

The Healing Blanket is an amazing piece of simple technology that works effectively! Although it is not an electronic device, it is made from natural elements like bamboo, silver and cotton, it still needs to be treated with the same respect.

Wherever possible try and keep it clean as constant washing is not advised. If you are concerned, you can put the blanket inside a duvet cover and it will not affect its functionality.

Do not wash the blanket in a washing machine, hand wash only. Using a washing machine will invalidate your warranty.

Hand
wash

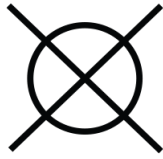

Hand wash only and gently. Do not wring the water out of the blanket, gently squeeze.

Do not
bleach

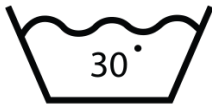

Do not use bleach on this product as it will destroy the properties of the pure silver EMF material and invalidate your warranty.

Avoid using softened water, especially from a salt or chemical water softener.

Do not
dry clean

The blanket is NOT suitable for dry cleaning!

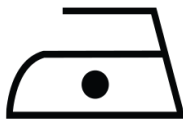

Wash at or
below 30°

Please wash in cooler water. Modern detergents are perfectly designed for low temperature washing. This is also great for the planet!

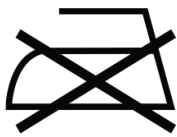

A product like Ecover ZERO Wool & Silk Laundry detergent is effective with no added colouring, bleach, or fragrance. This can be purchased from major supermarkets or at www.ecoverdirect.co.uk.

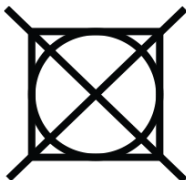

Iron,
low temp.

If the blanket needs ironing use a low temperature and only iron the bamboo fabric side!

Do not
steam

If the blanket needs ironing DO NOT use the steam setting!

Do not
tumble dry

DO NOT tumble dry the blanket, hang up to dry inside if you can, or in the shade outside.

Shade
dry

If drying the blanket outside, please dry in the shade. The blanket is like any other article of clothing in that it needs to be dried as quickly as possible to stop the potential damp smell.

If you have any questions please don't hesitate to get in touch – steve@scenartraining.co.uk

Silver Healing Blanket 3 in 1

Our silver 3 in 1 blanket has also been taken to the next level by being 3 in 1 – a healing blanket, an earthing blanket and an EMF radiation protection blanket. The 3 products:

1. The traditional healing blanket but with greater effectiveness, a fraction of the weight, soft and not crinkly (no foil sheet), just pure silver
2. Connect the earthing wire to the blanket and it works like an earthing blanket by absorbing unwanted energies/frequencies and dispersing them into the earth
3. Mobile signals 4G & 5G, wi-fi, Bluetooth, radar, and other frequency emissions are getting more and more dangerous, causing illness or a feeling of unwellness. Whatever you believe, 5G is harmful and causing a lot of health issues. The 3rd function of the blanket is as an EMF protection product. It stops all of the bad signals' dead in their tracks!

***“Take care of your blanket and it will
take care of you”***
